

YOUR EXPERT ONSHORE AND OFFSHORE

RIGGING & SERVICES WORLDWIDE

Tecklenborg, Kegel GmbH

Bremerhaven | Wismar

TECKLENBORG, KEGEL GMBH INTRODUCES ITSELF:

Founded over 90 years ago, Tecklenborg, Kegel GmbH is today both a traditional Hanseatic company and a state-of-the-art rigging company with locations close to North and Baltic Sea.

Everything from one source: in addition to the assembly, installation and testing of wire ropes, fibre ropes, lifting & lashing equipment, our range of services also includes a variety of worldwide services ranging from certified testing methods and offshore operations and includes availability of maritime personnel.

This complete program of goods and services also includes good consultation: our team of specialists with many years of experience will also find the optimum solution for your requirements. Honest, reliable and cosmopolitan: Our business culture is characterised by respectful and trustful co-operation with extremely flat hierarchies and fast decision-making processes.

We are certified according to ISO 9001:2015.

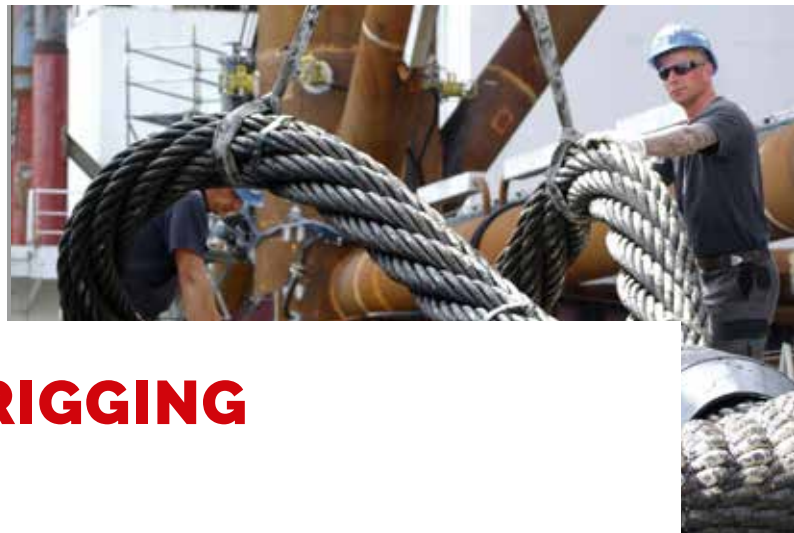

Whether lifting or lashing: our team of experts with many years of experience is there to help and advise you in every situation.

” *Start with
the necessary, then
the possible and
suddenly you will do
the impossible.*

Uwe Meier,
CEO

INSTALLATION, RIGGING AND SERVICES

In our workshops or by specialists and nautical personnel on site: We carry out worldwide assembly and installation services, for steel wire ropes, fibre ropes, chains, slings and other lifting and lashing equipment. Close cooperation with classification societies and compliance with the relevant specifications and regulations are part of our daily practice.

Our in-house sailmaking shop offers you customised solutions for boat covers, sun protection devices, truck and trailer covers, industrial covers and much more. Our aim is to always meet the highest quality and safety standards.

- ✦ Innovative products & solutions are created in cooperation with universities
- ✦ Execution of all types of rope installation worldwide incl. offshore
- ✦ Installation of ropes under pre-tension according to ISO 4309
- ✦ Availability of spooling machines for rewinding and installation work
- ✦ Manufacture and installation of classic and modern rigging systems

- ✦ Test bed with a capacity up to 700 tons with a testing length exceeding 30 metres
- ✦ Design and installation of fenders and mooring systems

- ✦ Certified production of rope end connections such as swaging, splicing or casting
- ✦ Design and manufacture of lifting equipment for all requirements
- ✦ Manufacture and installation of fall arrest equipment

TESTING SERVICES

Whether on site with our mobile testing equipment or in our workshop: We carry out certified tests in accordance with international regulations, on request also under the supervision of classification societies.

Using our state-of-the-art tensile horizontal test bed with a testing length exceeding 30 metres

we can carry out non-destructive and destructive tests on fibre and wire ropes, chains, shackles and other lifting equipment with up to 700 tons. Fatigue tests with up to 100,000 load cycles are possible and are documented according to the most up-to-date criteria.

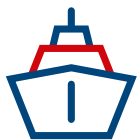

We test:

-  Lifting, lashing equipment
-  Hydraulics
-  Racks and ladders
-  Personal Protective Equipment (PPE) & fall arrest equipment
-  Life jackets
-  Pilot and embarkation ladders

We can:

-  NDT testing using magnetic particle (MT) or penetrant testing (PT) methods
-  Magnetic and visual rope inspections
-  Load tests with water bags and load cells
-  Dynamic and static load tests at boat and crane systems
-  Rope tension measurement
-  Alloy analyses
